No. 120

PROSPECTS FOR AMALGAMATION OF TWIN CITIES GROWING BRIGHTER

Harmonious Meeting Held in the City Council Chambers Last Evening

JOINT COMMITTEE TALKS OF PROPOSED AGREEMENT

When the meeting of the committee of Edmonton and Strathcona public men last evening, for the discussion of terms of amalgamation, no more harmonious gathering of a public character has been held in the council chambers since the incorporation of the city. A disturbing factor in Edmonton municipal affairs. Gathered around the table at which the city council is now sitting, were Mayor Armstrong, of the whole, Mayor Armstrong's clear, fifteen members of the joint committee, and the members of the proposed amalgamation agreement last evening, and except in the discussion of one or two of the clauses, it could have been by no means apparent to the outsider to whom the membership was unknown, who were the Strathcona and the Edmonton representatives. With the exception of clauses relating to the construction of bridges across the river near the Strathcona power house, and in the west, and a clause by which the Strathcona aldermen would be given power to determine upon what streets extensions of the

radial railway track should be carried out, agreement was reached without discussion, upon every one of the clauses.

A. C. Fraser, chairman of the committee, presided at the meeting, and other delegates present were Mayor Armstrong, Mayor Davies, ex-Mayor Duggan, Dr. Fortin, Ald. McNeil, Ald. Hyndman, Ald. Harrison, W. H. Clark, Ald. Tipton, Chairman Douglas, of the Strathcona board of trade, Ald. Hurlbert, Ald. Rankin, and A. A. Campbell, secretary. Audlin R. L. Richardson, was present throughout the session.

The name of the enlarged city will be "Edmonton."

The suggestion came from Mayor Davies, of Strathcona. "Edmonton is quite good enough for me," said he, and the name was the first question to be settled by the meeting.

The committee then passed on to consider Clause 4 of the proposed agreement, Clause 1, 2, and 3, which

(Continued on Page Three.)

COMPLETE WORK ON NORTH RIVER PIER OF THE C.P.R. BRIDGE

FORCE OF WORKMEN NOW ENGAGED IN MOVING MACHINERY FOR CONSTRUCTION OF PIER ON SOUTH BANK OF STREAM.

Towering above the swift-moving waters of the Saskatchewan river to a height of more than 100 feet the north river pier of the C. P. R. high level bridge between Edmonton and Strathcona is now under construction. Workmen are busy stripping its rock like sides of the cribbing which formed the moulds for the concrete and the machinery required for the construction of the immense pier is being moved to the south bank of the stream. Where the material will be used for the construction of the south river pier which has already been built up to a height of about 30 feet above the water level. As soon as the machinery is put into working shape this pier will rapidly be built up to the height of the completed one.

On the south bank of the river and all up the slope to the brow of the hill, workmen are engaged in excavating for the pedestals that will support the steel beams of the bridge. Concrete piles are being driven into these excavations and within a very short time everything will be ready for the installation of concrete.

HEAVY DEMAND FOR EDMONTON REALTY

Many Inquiries for Building Sites—Speculators Inactive at Present.

Speculative purchase of Edmonton real estate is not particularly active at present, according to the real estate men, the current demand being for subdivision property for actual building purposes. Unless a purchaser can show conclusively that he is buying property with a view of erecting a substantial building it is practically impossible for him to secure a loan at any of the local financial institutions.

(Continued on Page Eight.)

HUNGARIAN COLONY

For the purpose of locating upon Northern Alberta lands some sixty families from the United States of Hungary, three wealthy Hungarians of New York state leave the city for Jankins tomorrow, and during the week-end they will make a tour of the country north of the town, with a view to the establishment of a Hungarian colony in a locality well within reach of the produce markets, and possessed of the best in soil wealth.

FIGHTING FIRES IN MASSACHUSETTS

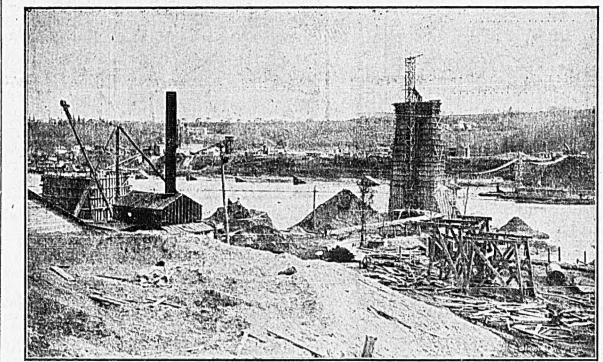

State Fire Patrol Unable to Cope With Flames Which Broke Out Yesterday.

East Hampton, Mass., May 12.—Mount Tom, the picturesque state reservation was ablaze today, its forests are clear to the summit, furnishing a thrilling spectacle to the country, for fire fighters, a hard battle before the flames were brought under control. It is the first fire in the reservation that the state fire patrol has been unable to cope with, locally.

Oil Company Loses \$100,000. Bradford, Pa., May 12.—Forest fires have broken out in the oil fields about here and tonight, it is feared the loss of oil property will be heavy. A telephone message from Eldred, Penn., 18 miles from here, announces that the tract of land where they join the main trunk of the creek, three boiler houses and oil tanks.

W. B. Poucher left last night on a trip to Calgary and Eshaw.

CANADIAN PACIFIC HIGH LEVEL BRIDGE

View showing one of the mammoth piers on the north side of the river, which was completed a few days ago. Work has now been commenced on the corresponding pier on the south side of the Saskatchewan.

OPERATORS AND MINERS TODAY

At Sitings of the Conciliation Board in Fernie, British Columbia.

Fernie, B.C., May 12.—The sitings of the conciliation board were continued today. General Manager Wilson, addressing a statement as to the cost of the coal output of 1909-10. The finances of the works were also brought into the spotlight, figures being put forward showing the revenue earned, stating the loaders received 16 cents to 17 cents a ton, while the drawers, averaged from 25¢ to 26¢ a month. A pit boss named Martin said he thought a miner ought to earn \$100 a month for steady work.

James McLean was then examined regarding the operation of the coke ovens, stating the loaders received 16 cents to 17 cents a ton, while the drawers, averaged from 25¢ to 26¢ a month. A pit boss named Martin said he thought a miner ought to earn \$100 a month for steady work.

G.T.P. PLANNING IMPROVED SERVICE

Citizens of Capital Can Spend Sundays at Lake Wabamun and Return Monday.

Edmonton's pleasure-seekers will be well looked after this summer so far as transportation facilities to summer resorts in the surrounding districts are concerned, for when the summer schedule of the Grand Trunk Pacific railway comes into effect on June 4th and 5th there will be a Saturday afternoon service both to Cooking Lake, 20 miles east of the city, and to Lake Wabamun, 40 miles west on the main line to the mountains.

The operation of the summer schedule will make it possible for persons residing at Lake Wabamun to leave Edmonton at 1 o'clock on Saturday afternoon, go direct to their camps and stay there until early Monday morning, when the returning train from Edmonton will land them back in Edmonton at 10:30 o'clock. The present daily except Sunday service will be continued on the Edmonton-Edson section of the road, the Saturday special being operated entirely independent of the regular passenger train.

East of Edmonton a daily except Sunday passenger train will be put in operation to Tofield and south over the Calgary branch as far as the end of Calgary, on the same date as the Saturday service to Edson goes into effect. This train will connect at Tofield with the regular east and west-bound passenger trains between Edmonton and Winnipeg, which will continue to leave Edmonton and arrive here at 9:30 a.m. and 8:15 p.m. respectively, as at present.

The Tofield train will leave Edmonton every week day at 4:15 p.m., returning to the city on the following day at 12:20 o'clock. Thus passengers on the west-bound through passenger train wishing to go down the Calgary branch will change to the Tofield train from Edmonton at that point, as the two trains will connect there. Passengers from stations along the Tofield branch will change to the Calgary branch as far as the end of Calgary, on the same date as the Saturday service to Edson goes into effect.

(Continued on Page Eight.)

CANADIAN NORTHERN EXPECTS TO PLACE 25,000 IMMIGRANTS ON HOMESTEADS THIS YEAR

PEACE RIVER LINE

Winnipeg, Man., May 12.—White and Tobin, of Montana, have been awarded a 30 mile contract on the Peace River line for the C. N. R. The section in question runs from Onaway, on the Lac Ste. Anne branch, to a point 40 miles northwest.

Peter Gunn, M.L.A. has the contract for clearing the right of way and it will be ready by June.

RESIGNATION WILL NOT BE ACCEPTED

Reform League Declares Stories Circulated About Rev. Fortune Are Pure Fiction.

Calgary, May 12.—At a meeting of the Temperance and Moral Reform Society of the province of Alberta, it was decided last night to refuse to accept the resignation of Rev. M. Fortune, field secretary. Fortune resigned because of reports circulated about him. Some hotel-keepers paid an attractive Spokane woman thousands of dollars to entrap him, and she said she had been laid out by the count by the charge, and the society decided that the reports were lying slanders.

Rebecca Jones, at 8 o'clock sharp tonight in Norwood block on Jasper avenue, to confer degrees for several candidates, nomination of officers and other important business. A large attendance is expected.

Company is Advertising in Number of American Newspapers and Settlers Are Coming by the Hundreds

OVER SIX THOUSAND WILL LOCATE IN THIS DISTRICT

Six Thousand Homesteads Within Thirty Miles of Athabasca Landing Ready for the Settler—Many Prospective Settlers Coming From Old Country

That immigration into the districts tributary to the C. N. R. lines through the west is heavier this season than ever before in the history of the road, was the statement made to the Capital this morning by R. Creelman, of Winnipeg, general passenger agent for the road, who is in Edmonton on business in connection with his department here. According to Mr. Creelman the railway company has inaugurated an advertising campaign, using a number of the large American newspapers as mediums, and expect thereby to place settlers this season on 25,000 homesteads lying tributary to their lines.

"We are advertising in the American newspapers that are known to reach the largest number of prospective settlers of the Canadian west. We are advertising 25,000 homesteads available within thirty miles of our railway lines. From information gathered at the Edmonton land office, we have found that within 30 miles of the Athabasca Landing line there are 6,000 homesteads available. There are thousands of homesteads still open for settlement along the main line of the railway, between Edmonton and Winnipeg. The Battleford line also opens up a splendid territory, as do the lines from Vegreville to Calgary and from Saskatoon to Rosetown, on the Vegreville-Calgary branch.

"We estimate that altogether there are 25,000 homesteads lying within a reasonable distance of our main lines and branches, and we are now in the midst of a campaign to settle up this land."

Speaking of the trans-Atlantic traffic on the C. N. R.'s two passenger boats, the Royal Edward and the Royal George, Mr. Creelman stated that west-bound travel has been exceptionally heavy this year, and that passage to Europe has been booked up until late in June by people going to the coronation.

In reply to a question as to the summer schedule on the western lines of the C. N. R., Mr. Creelman said that it has not yet been prepared, but that a change which will give Edmonton an increased passenger service over the line is under consideration.

"Edmonton will be well taken care of as regards passenger service over our line this summer," he said. "With the present service we have had difficulty in handling the large number of west-bound passengers. A new schedule will probably be brought into effect about June 1st."

COUNCIL MUST DISPOSE OF POWER HOUSE MONEY BYLAW BEFORE MAY 23

OR RE-SUBMISSION TO THE RATEPAYERS WOULD BECOME NECESSARY—PROVIDES FOR PURCHASE OF NEW MACHINERY FOR POWER HOUSE.

The question as to who is to purchase additional machinery for the power plant and the kind of machine to be installed this year will in all probability be settled by the city council at the next regular meeting on Tuesday evening or at a special meeting to be held the latter part of that week. The bylaw providing funds for the purchase of the machinery was ratified by the ratepayers several days ago but has been held up by the council owing to the fact that it was impossible to secure accurate information as to the cost of the machinery, which the commissioners intended to purchase. According to all the rules and regulations about now in the past it is necessary to pass the bylaw within four weeks of the time that it was ratified by the ratepayers. If it is not done it must be resubmitted for another vote. The four weeks will expire on Monday, May 22nd so that there is only one more regular council meeting at which it can be finally passed by the council.

It is stated in civic circles that there is a strong probability that there will be no council meeting, for the transaction of routine business, on Tuesday evening next, owing to the fact that the Bouillon-Butcher trial will be in full swing by that time and it is desirable that this question as to whether or not they are capable officials, should be settled at an early date.

If there is any indication of the trial being concluded by the latter part of the week it is probable that no council meeting will be held on Tuesday, but that a special meeting will be held later in the week when the money bylaw will

be finally passed and the routine business which is on hand disposed of.

PRESIDENT MADERO NAMES CABINET

Juarez Becomes Provincial Capital of the New Government.

Juarez, Mex., May 12.—Mexico's provisional President Francisco Madero today named his cabinet and with the establishment of the capital at the captured city of Juarez the country's provisional government becomes a reality. The names of the cabinet members follow:—Dr. Vasquez Gomez, minister of foreign relations; Gustavo Madero, minister of finance; Venustiano Carranza, minister of war; Federico Gonzalez, Garza, minister of the interior; Pino Suarez, minister of justice; Juan Azules, secretary to the President.

The railways and the telegraphs will be in charge of Secretary of War Carranza. His first act has been to grant permission for the repair of the Mexico and Northwestern railway and men are already at work on the line. The total absence of looking among the insurgents who have taken possession of Juarez demonstrates the fact that they are something more than an armed mob. The shattered city has already been cleared of its dead.

BOARD OF HEALTH VISITS BAKERIES

Are Making a Tour of Inspection Covering All Bakeries in the City.

Dr. T. H. Whitlaw and members of the city health board were engaged this morning in inspecting the different bakeries of the city, at least they started out on that mission but whether or not they completed their task has not been learned. The inspection party was modest, modestly dressed, and in the centre of the road. The doctor immediately doffed his coat and hat, and with the inspectors he found in the repair kit. The last seen of him he was repairing the tire and breathing maledictions on automobiles in general and specific terms.

Before His Honor Judge Taylor in the District court yesterday afternoon P. N. Brown pleaded guilty to wounding Herbert Ripley at the home of the former on February 20th. He was released on suspended sentence.

FESTIVAL OF EMPIRE

London, May 12.—Immense crowds lined the streets of London today under magnificent banners, and the royal highnesses King George and Queen Mary drove through the streets, from Buckingham Palace to South London to open the Festival of Empire at the Crystal Palace.

Parts of the route were lined with boy scouts and a feature of the procession were the 80,000 school children who had been furnished with seats and were spectators of the pageant. The Prince of Wales and Princess Mary accompanied their Majesties. Several triumphal arches marked the route and there was rather more than usual of the brilliant show of military uniforms characteristic of these functions.

During the visit of the Sheffield choir to Edmonton Mr. and Mrs. G. A. Dyson entertained six of the singers, four of whom were intimately acquainted with them in Sheffield from which place Mr. and Mrs. Dyson came to Canada.

PUBLIC BUSINESS SUSPENDED TODAY

ARBOR DAY OBSERVED IN EDMONTON—SCHOOLS OF CITY CLOSED

Today, being Arbor Day, and a holiday in the week in the city offices, closed. The banks are also closed but the retail and wholesale stores are doing business the same as any other day, all the schools of the city are closed, as has been the custom in the past, only one or two employees in each department are working, just enough to meet the demands which may be made. Mayor Armstrong was in his office as usual and Commissioners Hamilton and Buehler were assiduously working on some lengthy documents, presumably their statements of defense in the action which is to be heard on Monday and in which they occupy the centre of the stage.

No arrangements have been made for the celebration of arbor day by the students of the city as a whole but a large number of them are observing the day by planting trees and shrubs around their homes.

In the states and territories of the United States the day is observed by having the children plant trees and shrubs around the schools, but in Canada and especially in Edmonton this deemed unnecessary as the old established structures already have beautiful lawns and playgrounds.

Arbor day was first observed in the United States upon the suggestion of B. O. Northrup, then secretary of the Connecticut board of Education.

J. Sterling Morton, of Nebraska, however, was the first to propose that the state legislatures set aside the day as a holiday and that it be observed by planting trees and shrubs. This custom was instituted for the first time in Nebraska in the year 1872. Nebraska was followed by other states and territories until today there is scarcely a state in the union that does not observe the day. The exact date is not uniform throughout the country, it being celebrated upon the date set by the governors of the different states.

Today being Arbor day and a holiday the officers at the legislative buildings are closed.

For Bald Heads

A Treatment That Costs Nothing If It Fails.

We want you to try three large bottles of "REXAL" "93" Hair Tonic on our personal guarantee that the trial will not cost you a penny if it does not give you absolute satisfaction. That's proof of our faith in this remedy, and it should indisputably demonstrate that we know what we are talking about when we say that "REXAL" "93" Hair Tonic will grow hair on bald heads, except where baldness has been of such long duration that the roots of the hair are entirely dead, the follicles closed and grown over, and the scalp is scaled.

Remember, we are basing our statements upon what has already been accomplished by the use of "REXAL" "93" Hair Tonic, and we have the right to assume that what it has done for thousands of others it will do for you. In any event you cannot lose anything by giving it a trial on our liberal guarantee. Two sizes, 50c, and \$1.00. Remember, you can obtain "REXAL" Remedies in this community only at our store—The Rexal Store. A. Archibald.

Buying Blue Ribbon Goods Is Economical

When you buy Blue Ribbon Tea, Coffee, Baking Powder or other Blue Ribbon lines you save money. Not only do you get goods of better flavor but they last longer. And you are safe in buying Blue Ribbon lines for they are guaranteed. Your grocer will refund your money if you are not fully satisfied. We only ask that you return the balance of the article bought. But we feel sure you will be delighted with these goods when once you try them.

All members of the 101st Fusiliers are requested to be present at the assembly on Second street. There are only a few days left until the regiment will go to Port Saskatchewan for the Victoria day celebration and it is necessary that no opportunity be lost to improve the efficiency of the corps. The orderly room is open every evening and anyone wishing to enlist can be sworn in.

PROSPECTS FOR AMALGAMATION

(Continued from Page One.)

provides for representation in the common council, upon the basis of population with not less than three seats in the council allotted to the south city, and for the assumption by the greater Edmonton of all debts and contracts of the Edmonton and Strathcona of today, having been agreed upon last week.

Clause 4 provides for the extension of the charter of the Edmonton radial railway to the enlarged city, and a proviso that the extensions to be made south of the river, should be along the streets named by the southern representatives, gave rise to some misunderstanding. President Douglas of the Strathcona board of trade pointed out that while Edmonton had in the past in a perfectly natural manner considered her own interest first in the extending of the street railway system, it is advisable now to protect the interests of Strathcona. "We merely want a guarantee," said Dr. Torg, "that certain extensions should be carried out, and do not want to bind the future council to anything further than this, and W. H. Clark's suggestion that certain extensions, to be carried out by the united city subsequent to amalgamation, should be guaranteed, and that when these had

Her Face and Body Were Litterly Covered With "BOILS."

Burdock Blood Bitters Cured Them.

Mrs. John H. King, Johnston, N.B., writes:—"Last summer I was very much troubled with boils, and my face and body were literally covered with them. A friend advised me to take Burdock Blood Bitters. I got three bottles, and before I had taken all the first one my boils began to go away. I had just taken a few doses out of the last one when they all disappeared. My husband has also used Burdock Blood Bitters with much benefit."

Boils in themselves are not a danger, one trouble, but still, at the same time, are very painful. They are caused entirely by bad blood, and to get rid of them it is necessary to put the blood in good condition, and for this purpose there is nothing to equal that old and tried remedy, Burdock Blood Bitters.

Manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

been completed, the question of extensions should be entirely at the disposition of the new council, appeared to meet with general approval. On Dr. Torg's motion the matter was then referred back to the Strathcona committee, which will report to the next meeting of the amalgamation committee on Thursday next.

Clause 5 of the draft agreement, as it stood after revision last evening, provides that branches of the municipal service for the compilation of assessment roll and the collection of taxes, for the collection of water rates, and electric light and power rates, shall be maintained in the south of the river. It also provides for the maintenance of police court in Strathcona.

Purchase of necessary property to complete Saskatchewan ave., Strathcona, the avenue to be opened and maintained as a special public driveway is provided for in Clause 6. The greater portion of the property is already acquired, and it is provided by this clause that the driveway, with the exception of the sidewalks, shall be maintained out of the general revenue of the larger city. The University of Alberta will rest in control of the highway, in that they will assert their privilege of installing gates, and so retaining to themselves in a legal sense the right of way. Dr. Torg suggested that the university might make its own regulations as to the speed of automobiles on the avenue, on University property, and such other regulations as may be for the purposes for which required to ensure that the

use of the driveway does not lead to abuse. Upon the above and upon almost all of the clauses suggested by the Strathcona committee, the Edmonton representatives agreed, without party either than explanatory discussion. Clause 7 provides that the park purchased from the Strathcona athletic association shall be maintained as a sports ground, and a sports day held each year.

Special regulations for the opening and maintaining of streets, to apply to the whole city, will be drawn up, in accordance with the provision of Clause 8. Clause 9 provides that the Strathcona markets shall be maintained and enlarged as required, while Clause 10 requires that the general rate to cover the cost of the Strathcona bridge across the Saskatchewan, from the Strathcona power house to the flats on the Edmonton side, and another bridge in the west end, that some difference of opinion became apparent. To several of the members of the committee it appeared that this clause might wreck the agreement, if insisted upon. The bridge to the flats would cost about \$200,000, and the proximity of the high level bridge, and the present traffic bridge, was urged

against the new proposal. Mayor Armstrong pointed out that the Dominion government required that no bridge might be constructed except at a height of thirty-six feet above high water level. It was a general opinion among Edmonton delegates

Two Statements Side by Side, But No Change

When the province of Alberta undertook to guarantee the bonds of a railway from Edmonton to Fort McMurray, at \$20,000 a mile, certain interests and certain politicians raised a most uproarious row to the effect that the figure was altogether too extravagant. It was alleged by many of these that the project to tap the north was being used to secure a guarantee that was out of all proportion to the cost of building a railway across a flat country, only partially timbered, and the insinuation was coupled with this allegation that some one was due to make an immense rake-off.

Now the C. N. R., under Ottawa auspices, is about to build a section of its main line through the clay belt of Northern Ontario, a country not more difficult for railway construction than the country between Edmonton and Fort McMurray, and the Ottawa government is going to guarantee the road at the rate of \$35,000 a mile.

The Edmonton Bulletin, Frank Oliver's organ, fought most strenuously against the construction of a railway northward from Edmonton on a \$20,000 guarantee. It is noticeable that the Bulletin does not raise any protest against a \$35,000 guarantee for a railway through the clay belt of Northern Ontario.

The minister of the interior in his momentous speech in Ottawa the other day became author of the statement that to set two facts side by side does not constitute a charge.

It is therefore no charge against the minister to point out that the line which his organ did oppose in Northern Alberta was not a Canadian Northern line, whereas the line which his organ does not oppose in Northern Ontario is a Canadian Northern line.

Conservative Managers' Narrow Gauge

If anything was necessary, after the record of the past ten years, to show that the conservative party is led by a narrow-gauge bunch, plenty of proof of the fact is to be found in the action of the opposition in Ottawa upon the question of reciprocity.

Without a chance in the world of being able to defeat the reciprocity pact in the Dominion house, or even to change it one iota, the conservatives have talked and talked and talked, with no other apparent motive in the world than to kill time and compel an extra session after coronation.

It is just possible that this may look like astute generalship to the eastern mind, but out here in the west where the seasons are short and time has a real value, the man who talks after he has finished having anything to say is not regarded as a clever man but avoided as a blatherskite.

An Accounting System Which Does Not Account

In constructing their charges against Mr. Bouillon and Mr. Butchart the city council omitted one of the failings of the present system of administration for which Mr. Bouillon is directly responsible.

For many months past a great deal has been heard of the centralized accounting system which Mr. Bouillon announced as a triumph which he was about to achieve. The centralized system went into vogue at the end of the last fiscal year, October 1, 1911. Since that date not a single complete report of any one month's business in any one department has yet been given out.

In Calgary, for instance, the newspapers publish on the first day of each month a profit and loss statement showing what the street railway made in the last month. In Edmonton it is absolutely impossible to get such a statement for the reason that from the accounting system which Mr. Bouillon has evolved Mr. Bouillon himself cannot tell what the street car system is making or losing.

JUST PARAGRAPHS

The adjournment of the Dominion house will give Hon. Frank Oliver an opportunity to extend the scope of reciprocity by putting in with Theodore Roosevelt to form an International Ananias Club.

The Royal Bank has just paid \$75,000 for the Methodist church in Medicine Hat. Thus does the modern monetary system reverse the ancient report of the money changers who were driven from the temple.

An Hungarian countess has just come forward with facts and figures to prove that the millennium is due to arrive in 1917. This leaves Mr. Bouillon in the position where it makes little difference whether he resigns now or tries to beat the Hungarian lady to it.

The Toronto News and other Conservative papers which are congratulating themselves in the belief that Dick McBride is going to become lieutenant to R. L. Borden are certainly mixed in their essays of the two men. If Borden could show that he was qualified to carry water where Dick commanded the regiment he would be doing fine.

Every Share of the Stock of the Edmonton Portland Cement Company, Limited, should be owned by the people of Edmonton and vicinity, for three reasons:—

1. It is an Edmonton enterprise; there is plenty of money here for it; the shares should be kept at home.
2. It should pay 40 per cent. dividends on its capital stock from the day the plant begins to operate.
3. The shares should go to \$200 in two years and \$500 in five years.

Read Article No. 5 and see what this enterprise means to Edmonton.

ARTICLE NUMBER FIVE

In order to fully appreciate the remarkable future which lies before the Edmonton Portland Cement Company it is necessary to keep in mind two facts; one is the unprecedented growth of the cement industry, and the other is essential conditions for a successful Portland cement plant.

As has been stated before in this series of articles, the growth of the Cement industry in the past twenty years has no parallel in the industrial history of the world. In the beginning, Portland Cement was used only for bridge building, aqueducts, and other construction requiring a hydraulic cement. Then came that great area of building which had its beginning about twenty years ago, and with it came the demand for some building material, more practical than brick or stone, and equal to such gigantic engineering undertakings as great railway tunnels, subways, irrigation and reclamation projects, and finally the Panama Canal, where 3,000,000 barrels of Portland cement will be used. Concrete met these vast requirements far better than stone, and the demand for Portland cement received another powerful impetus.

And then, with the rise of those practical as well as humane and aesthetic considerations, which came to rescue the material civilization of the twentieth century from its dangers and impermanence, was heard the world wide call for a building material that would be not only permanent but fireproof. The fragile and rapidly decaying character of modern buildings, as compared to the magnificent monuments of by-gone ages, had been a poor testimony to the skill and forethought of modern builders. And the London fire costing \$55,000,000, the Moscow fire costing \$150,000,000, the Hamburg fire costing \$175,000,000, the Chicago fire costing \$190,000,000, the San Francisco fire costing \$300,000,000 and finally the indescribable horrors of the Iroquois theatre holocaust, was the voice of trade and the cry of home for a building material that would make such world tragedies impossible.

Concrete the Construction Material of this Century

Sir Henry Bessemer, by his discovery of the decarburization of steel, had made cheap steel for construction purposes possible, and steel had its day of trial. But steel was open to the serious objection of rust and the fatal fact that under a moderate heat it will warp and collapse and in the furious flames of a conflagration, it melts like wax. But **REINFORCED CONCRETE**, which first came into use in 1895, and which is merely steel construction imbedded in concrete walls, met the conditions perfectly, and the result was a building material which defies the horrors of fire and the ravages of time.

And the material monuments of twentieth century civilization will crown with immortal fame the names of two great Englishmen, one a nobleman, the other from the ranks of labor; Sir Henry Bessemer, and Joseph Aspdin, the Leeds bricklayer, who, in 1825, discovered Portland Cement.

With the universal adoption of Concrete as a building material, Portland Cement took another ten strides forward in the seven-league boots of modern progress.

Then came the adoption of Portland Cement for special purposes—which will be discussed in a subsequent article, such as the monolithic house, tree preservation, ornamental concrete, and a hundred domestic uses on the farm. And the cumulative results of these manifold demands for Portland Cement is shown in the following table:

GROWTH OF THE CEMENT INDUSTRY IN AMERICA FROM 1870 TO THE PRESENT TIME.

Year	Number barrels produced.	Year.	Number barrels produced.
1870 to 1879	82,000	1895	590,321
1880	42,000	1896	1,843,023
1881	42,000	1897	2,677,775
1882	85,000	1898	3,692,284
1883	90,000	1899	5,052,266
1884	100,000	1900	8,483,020
1885	150,000	1901	12,711,225
1886	150,000	1902	17,230,644
1887	250,000	1903	22,342,973
1888	250,000	1904	26,505,881
1889	300,000	1905	35,246,812
1890	335,500	1906	46,663,424
1891	454,813	1907	48,875,210
1892	547,440	1908	51,072,912
1893	590,325	1909	62,908,461
1894	789,575	1910	74,000,000

A Remarkable Advantage

The other great fact to be kept in mind is that while the demand for Portland Cement is as yet but in its infancy, and ten years hence 200,000,000 million barrels will be consumed annually instead of 74,000,000; that practically this whole continent has been prospected for Cement materials—for the marl or lime rock and the clay, shale or slate. For many years plants were only located where the two materials could be found near together. But as they have no geological association and are only found contiguous by mere chances, opportunities like that were soon exhausted. Now cement mills are being built where one material is to be found and the other is shipped to the mill. And some plants are being built at a long distance from either material. The competing plant nearest to the Edmonton Portland Cement Company ships both of its materials by rail—the lime-rock 65 miles and the shale 28 miles.

All of this adds to the cost of production and increases the market price of Portland Cement. And as the demand for Portland Cement grows and the cost of its manufacture advances, the advantages of such a property as that of the Edmonton Portland Cement Company increases enormously.

The Edmonton Portland Cement Company owns what is believed to be the largest marl deposit on the American Continent; from surveys and testings **ALREADY** made, the deposit is sufficient to supply a 1,500-barrel mill for forty years. When complete surveys and testings have been made, the deposit will undoubtedly be found sufficient to supply a 2,500-barrel mill for forty years. And the plant of the Edmonton Portland Cement Company will be so built that it can be enlarged to a 2,500-barrel capacity whenever the market creates the demand. The clay bed is only five miles away and is far greater in extent than will ever be required.

What this means to Edmonton

Now all of this means that a cement mill situated as is the plant of the Edmonton Portland Cement Company, has a very great advantage. It can sell its product at the market price fixed by its competitors that are manufacturing cement under unfavorable and costly conditions. And it can produce its product at from three-fourths to one-half the cost of manufacture at such plants.

The Edmonton Portland Cement Company has a marl deposit sufficient for the production of **AT LEAST 12,500,000** barrels of Portland Cement and probably **TWICE** that amount. Its clay bed is still greater. An inexhaustible coal supply is at its very door. It need never cost the Edmonton Portland Cement Company more than 78 cents a barrel to manufacture cement. And as the market grows and the price advances this plant can go on producing Portland Cement at the present manufactured cost, and add to its profits the increase in cost of production and freight charges on materials, necessary to competing plants, and always find an instant demand for its output at the market price fixed by the disadvantages of its competitors.

This is another reason why the Edmonton Portland Cement Company, Limited, should pay 40 per cent. dividends on its capital stock, why its shares should go to \$200.00 in one year and to \$500 in five years, and why every share of its stock should be kept at home.

The Hudson's Bay Co.

score was ten to one in favor of Edmonton, and the number of errors charged up against Saskatoon four, all costly.

Woods pitched a game which while erratic was the kind that keeps the batter from making runs. He allowed only two hits and passed out two men. His control was not perfect but he nearly always set the pace before he let a man get on.

Cherry Cox came back with his batting eye strong, making a two base run and a sacrifice hit and scoring two runs. Lassi

clashed out a double in the sixth and Lassi hit for three bases scoring Murphy who got on the base by the first walk that Woods gave.

Edmonton stole a base in the second, third, fourth, fifth and sixth innings, mostly on the error, although in the fourth inning they had clean hitting and base stealing did the trick.

For the first round Morse held the Eskimos down striking out two, but in the second round he was overpowered by a walk and three batters by McCallen.

Edmonton scored in the second, third, fourth, fifth and sixth innings, mostly on the error, although in the fourth inning they had clean hitting and base stealing did the trick.

struck out. Sorenson hit, but Woods flew to second.

Morse Jaw—Sorenson walked. Allan died on a grounder to second. McCallen squashed the ball for three bases and Sorenson scored. Trainer was hit. Walsh struck out and Graham tried a fly to Cox. Edmonton. Mills limited and beat it out to first base. Sorenson sacrificed. Dudley

swatted a smash good for three bases scoring Mills, but failed to make it a home run and failed to make the plate. Burr

tried a fly to first base.

Sixth Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Seventh Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Eighth Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Ninth Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Tenth Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Eleventh Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Twelfth Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Thirteenth Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Fourteenth Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Fifteenth Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Sixteenth Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Seventeenth Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Eighteenth Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Nineteenth Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Twentieth Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

game. Burr hit and stole second. Sorenson walked and Woods struck to the first base.

Twenty-first Inning In succession went to the bench being retired without seeing canvas. Edmonton—Mills tried to hit on an error, went to third on Sorenson's hit. Dudley bunted and Morse tried to get Mills at home but failed and lost the

REAL ESTATE BULLETIN

Demand for Jasper Avenue still continues strong, and one lot, at least, in the West End, has changed hands today, while several others are under consideration.

Warehouse sites with trackage are also in good demand, and there is certain to be a large addition to the wholesale trade of the city during the present season.

In residential lots, the enquiry is almost entirely for building purposes and confined to the West End.

In houses, the demand in the West End is well maintained, and further sales have been made of first-class property, close in.

ALBERTA PARK

This property is well worthy the attention of investors and we still have some good blocks left for their selection, but advise prompt action, lest the best of these be secured before-hand by others. We are prepared to take out prospective buyers at any time convenient to themselves.

Phone 28 to 1850 and arrange to see it.

HEAVY DEMAND

(Continued from Page One.)

Those wishing to erect first class dwellings are enquiring for property in the Great estate, and Inglewood. Building is very active this spring in these subdivisions both on newly purchased property and on lots that have been held for some time by the bidders. There is a marked movement of property in Norwood and old Delton for the erection of residences of a cheaper class. The fact that Delton lots are 50 feet by 150 is making them popular among the class of people that are looking for a place large enough for a comfortable house and a garden.

Warehouse property between Fourth and Fifth streets and between Sixth and Seventh streets where spur tracks are projected is in great demand at present. In almost every case enquiry is in behalf of firms that either have branches in the city and are looking for better locations or outside firms that are planning to establish branches here.

Negotiations looking to the amalgamation of Edmonton and Strathcona are having the effect of placing Strathcona inside and subdivision property in good demand. Considerable Whyte avenue property has changed hands during the past week, chiefly on speculation. In the Groat subdivision there is a steady demand for property for building purposes.

G. T. P. PLANNING

IMPROVED SERVICE
(Continued from Page One.)

field branch wishing to visit eastern points along the main line may take the morning train into Tofield and connect there with the morning through passenger train leaving Edmonton at 9:30 a.m. if they wish to come to Edmonton they may take the Tofield branch train right through to the city. The inauguration of this service over the Tofield branch will make it very pleasant for commuters at Cooking Lake. With the service in operation it will take and return to Edmonton at 8:15 o'clock on Saturday afternoon, spend Saturday evening and Sunday at the lake and return to Edmonton at 8:15 Sunday evening on the regular Winnipeg-Edmonton through train or on the Tofield branch train which arrives in Edmonton at 12:30 o'clock on Monday morning.

Not a Day Passes

but someone sells a piece of Edmonton Real Estate at a large figure, bought only a few years previous at a very small price.

In many instances this one piece of property has made them more than they have been able to save from their business or wages in years.

Are you Willing

to be one of these fortunate ones? The same opportunities are being offered today, with a greater assurance of profit than any of those deals made in the past, for the reason that Edmonton is now sufficiently established to warrant any industry or corporation locating here.

G. T. P. Addition

has many advantages over many of the propositions offered today, because it is favorably situated in the vicinity of what will be the largest pay-roll district in the city and near the property purchased by the city for factory sites.

This Property is High & Dry

the prices are very cheap

\$90
—to—
\$200
per Lot

and the terms easy—\$10.00 cash and the balance \$5.00 per month, with extension of time in case of sickness and a free transfer to the heir in case of death of the purchaser.

Come in and let us tell you more about this property.
